Professional Summary

SOC Analyst with CompTIA Security+ and OCSA certifications and hands-on Tier 1 experience from a cybersecurity internship at F9 INFOTECH. Skilled in SIEM monitoring (Splunk, Elastic, Wazuh), alert triage, log analysis, and detection rule engineering. Built an AI-powered phishing detection and security-awareness platform, and home SOC labs that simulate attacks and detect them end to end.

Certifications

CompTIA Security+ (SY0-701)

Offenso Certified Security Analyst (OCSA)

Technical Skills

SIEM & Log Management: Splunk, Elastic SIEM / ELK Stack (Elasticsearch, Logstash, Kibana), Wazuh; log ingestion, detection rules, dashboards, false positive tuning

SOC Operations: Alert triage, incident investigation and escalation, log correlation, threat detection, phishing analysis, malware detection basics

Endpoint & Network Monitoring: Sysmon, Windows Event Logs, OPNsense, traffic analysis, TCP/IP, OSI, DNS, HTTP/HTTPS; **Automation:** Tines (SOAR), Groq, Claude API

Tools, Systems & Programming: Burp Suite, Kali Linux, Nmap, Nikto, Gobuster; Linux, Windows, system hardening; Python, C, Java

Experience

F9 INFOTECH Kochi, Kerala

Intern – Cybersecurity *July 2026 – September 2026*

- Monitored security events and analyzed logs to triage alerts and investigate potential threats.
- Supported risk assessments, threat assessments, and disaster recovery planning under senior engineers.

Projects

CyberSafe – AI-Powered Phishing Detection & Awareness Platform | *Claude API, Rule Engine* | Live

- Built a tool that analyzes suspicious emails, SMS and URLs and returns a phishing, suspicious or safe verdict, explaining each social-engineering tactic with evidence and a recommended next step.
- Combined a deterministic rule engine (urgency language, lookalike domains, raw-IP links, OTP/credential requests, prompt-injection attempts) with AI analysis tuned for Indian scams such as UPI, KYC, Aadhaar and IRCTC.
- Added phishing simulation campaigns that track clicks, reports and ignores, plus a training quiz and a dashboard of awareness scores with CSV export.

AI-Assisted SIEM & SOC Automation | *Elastic SIEM, Sysmon, Tines, Groq*

- Deployed Elastic SIEM with Sysmon to monitor Windows security events.
- Wrote detection rules and built Kibana dashboards for continuous monitoring.
- Automated alert enrichment and triage with Tines and Groq AI, sending analyst email notifications to cut response time.

Home SOC Lab – Threat Detection & Alert Engineering | *Splunk, Kali Linux, Nmap, Nikto, Gobuster*

- Deployed Splunk in a two-VM attacker/target lab and configured log ingestion for continuous monitoring.
- Simulated port scans, web vulnerability scans and directory brute-forcing, and built a custom detection alert for each.

Education

APJ Abdul Kalam Technological University

B.Tech in Electronics and Computer Engineering *2021 – 2025*

Montfort School, Anakkara

Senior Secondary Education | Score: 76% *2019 – 2021*

Zion Public School

Secondary Education | Score: 78% *2019*
